

ROOFER PARTNER PROGRAM

SOLAR OFF. ROOF ON. DONE RIGHT.

Detach and reset service for Colorado roofing companies that expect clean work and clear accountability.

WHO WE ARE

A solar contractor roofers can trust.

Seed Solar has served homeowners since 2020. In 2022, we brought operations in-house and built a Colorado EPC focused on workmanship, communication, and long-term service.

WHY SEED SOLAR

Your solar vendor reflects your company.

Homeowners remember every crew on the job. We protect the experience your team worked to create.

01 ONE ACCOUNTABLE TEAM

Seed Solar owns the solar scope from shutdown through production verification.

02 ROOF-AWARE WORK

Our crews coordinate attachments, flashing, staging, and reset timing around the new roof.

03 PROFESSIONAL CLOSEOUT

Photo records, organized wiring, clean staging, and a confirmed system startup.

04 LOCAL SUPPORT

Colorado field teams support reroofs across our core service areas.

QUALIFIED TO HANDLE THE SYSTEM

Experience across the platforms on Colorado roofs.

SERVICE AREAS

— DENVER METRO

— COLORADO SPRINGS

— NORTHERN COLORADO

— SUMMIT COUNTY

ONE CONTRACTOR. MORE CONTROL.

Licensed to manage more of the project.

Seed Solar combines solar expertise with the licensed electrical and construction capability required for complex reroof projects.

MASTER

ELECTRICIAN LICENSE

Supports electrical permit responsibility, code corrections, service work, and safe recommissioning under the applicable project scope.

CLASS B

GENERAL CONTRACTOR LICENSE

Adds broader construction capability and coordination when a project extends beyond routine solar removal and reset work.

PERMIT SUPPORT

Seed Solar can manage and pull applicable electrical and building permits where authorized by the local jurisdiction.

Fewer handoffs. Clearer responsibility. One team to resolve issues.

SIX CONTROL POINTS

A clean handoff from roofing schedule to solar startup.

01 PROJECT REVIEW

System, access, dates

02 DETACH

Shutdown, label, inventory

03 PROTECTED STAGING

Organized onsite storage

04 ROOF READY

Your team confirms completion

05 RESET

Reinstall and restore wiring

06 VERIFY

Startup, production, photos

ONE POINT OF CONTACT

Direct coordination with the roofer and homeowner throughout the project.

STANDARD SERVICE

The solar scope stays organized and documented.

01 Safe shutdown and isolation**02** Labeled component inventory**03** Orderly onsite staging**04** Reset with approved attachments**05** Wiring restoration and startup**06** Before and after photo record

QUOTE VARIABLES

Module count / Roof pitch and access / Racking condition / Electrical corrections / Travel and specialty equipment

Field conditions outside the approved scope require documented authorization before additional billable work begins.

SEED SOLAR WORKMANSHIP COVERAGE

10 YEARS

of detach and reset workmanship coverage

Our 10-year workmanship warranty covers the solar removal and reinstallation work included in the approved Seed Solar scope. Project-specific terms and exclusions appear in the written agreement.

MANUFACTURER COVERAGE

Existing equipment warranties can remain in place.

Seed Solar's workmanship warranty adds protection without replacing the remaining manufacturer warranties on eligible panels, inverters, optimizers, microinverters, or other equipment. Continued manufacturer coverage depends on the manufacturer's terms, equipment eligibility, and required service procedures.

TWO LAYERS OF PROTECTION

Seed Solar workmanship coverage + remaining eligible manufacturer coverage

NEXT PROJECT

Send the roof. We will handle the solar.

For a fast review, send the project address, module count, roof type, site photos, and target roofing date.
